Eclipse™, Provider™ and Retract-a-Lite™ Series

Remote Fixtures

Create a family look for emergency lighting layouts with these remote fixtures

Keep your remote emergency lighting fixtures all in the family with these remote versions of three of our most popular decorative battery units.

Eclipse™ Series (R-ECL)

The **Eclipse™ Series** remote emergency lighting fixture features a contemporary, elegant design in a compact thermoplastic housing. Attractive and versatile, the **Eclipse™ Series** fixtures can be mounted in any orientation on walls and ceilings and are ideally suited for commercial or architectural applications requiring versatile, yet fast, installation.

Provider™ Series (R-CPRO)

The **Provider™ Series** remote emergency lighting fixture combines a sleek, low profile body design and transparent light shield with a complete package of high performance features and options. The **Provider™** is ideally suited for any commercial application requiring high performance in an attractive, modern package.

Retract-a-Lite™ Series (Remote RTL)

The **Retract-a-Lite™** remote emergency lighting fixture uses recessed cabinetry to conceal all internal components within wall or ceiling cavities, remaining almost invisible until needed. When AC fails and the lights go out, the **Retract-a-Lite™** unit emerges, illuminating the path to safety. Ideally suited for any environment where aesthetics are a prime consideration.

N.B.: All of these remote emergency lighting units require an external DC source. For self-powered units, please refer to "Battery Units" section.
