
CALIFORNIA OFFERING

Emergi-Lite®

Full range of emergency
lighting solutions

California Energy Commission (CEC)

Title 20 Certified Emergency Lighting

The lighting products included in this brochure are certified and comply with the California Energy Commission (CEC) Title 20 Appliance Energy Efficiency Standards.

The CEC Title 20 Compliant products in this brochure have been:

- Proven to meet the applicable efficiency standards
- Tested in a CEC-approved lab
- Marked in accordance with the Title 20 certification requirements

Our CEC Title 20 certified emergency lighting products are ideal for use in architectural, commercial, and institutional environments. The complete range of solutions we offer meets specifications for both new construction and retrofit projects.

Meeting and Exceeding Quality and Performance Standards

All our emergency lighting equipment is designed and manufactured to meet and exceed the highest standards in the industry, with quality built in and tested at our North American manufacturing center of excellence. We ensure that our products are compliant with the latest applicable codes and regulations.

LED Efficiency and Durability

Our product offering is streamlined to use energy-efficient LEDs. LEDs provide exceptional illumination with low energy consumption and lower lamp temperatures. As well, the long operational life of these lamps means they practically last the lifetime of a building.

Outstanding Service and Reliability

Our experienced service team stands behind our products. You can count on our proven, trusted, reliable products and industry expertise.

Nexus®

Emergency lighting monitoring system

Building & Life Safety Codes oblige building owners/managers to ensure the safe evacuation of a building in the event of an emergency.

—
01 Nexus® is a proven system supported by a 5-year warranty, and can contribute to LEED certification and support green building initiatives.

Are you prepared for a safety inspection?

In the interest of public safety, building owners/managers must meet the outlined requirements for exit signs and emergency lighting equipment, including the following:

- Conduct a discharge test every month.
- Conduct functional tests annually.
- Keep a log book of maintenance information.

Complying with these requirements can be labor intensive and costly, especially in large buildings where testing every emergency light requires many man-hours. Disrupting the power supply during lengthy inspections can also put public safety at risk.

Manage testing with Nexus® to save time and costs

Nexus® is a real-time monitoring system that manages the status of your entire emergency lighting and Exit Sign system from a central control unit. Nexus® runs diagnostics, performs required monthly and annual functional tests, generates maintenance logs and runs compliance reports. Available in wired or wireless (RF) versions, Nexus® installations often pay for themselves in less than two (2) years. In addition to operational savings, Nexus® helps increase system reliability and performance and reduces the risk of failed inspections. One building or a group of properties under the same management can be monitored with Nexus®.

Maximize system availability

By allowing maintenance personnel to easily maintain and monitor the emergency lighting system without having to manually check each unit, Nexus® reduces the hours required to disrupt the power supply for inspections. With Nexus®, monthly tests and reports on the status of all emergency lights and exit signs can be done individually, in groups, or together.

Advantages of the Nexus® system include saving labor; maximizing system availability by testing units in groups and stages rather than setting all units in recovery mode; and the convenience of self-monitoring. Nexus® indicates the location of a faulty unit and reports it instantly without requiring a manual search.

One building or a group of properties under the same management can be monitored with Nexus®.

Update status instantly

Nexus® passes messages both to and from the emergency units to instruct the units to perform all mandatory testing by communicating between the emergency units and a centrally located controller. Nexus® is a proven system supported by a 5-year warranty, and can contribute to LEED certification and support green building initiatives.

Small system example

In a system of less than 100 units it is most likely that the only hardware required, other than the emergency units themselves, is a controller. All communication would occur wirelessly and installation would not vary greatly from a nonmonitored system. Once the units are in place, the system will establish the mesh network. The building itself could be quite large as each unit only needs to be able to communicate with its close neighbors and does not need to communicate directly with the controller.

Large system example

The Nexus® RF system has been designed to be extremely flexible and provides for a range of system options. Each large site will need to be assessed for the best system solution with the assistance of Emergi-Lite® technical staff. The basic Nexus® RF system is designed to run on an Ethernet network which is present in most modern buildings however through a range of interface cards the backbone of the network could be WLAN.

As with the small system example, site performance will be optimized through the careful selection and placement of area controller routers and the area controller to form efficient clusters. Building layout and materials will also play some role in determining the best solution to deliver a highly effective means of testing and maintenance requirements.

For Nexus® compatibility please refer to individual product pages for complete details.

High output MR16 LED

Emergency lighting

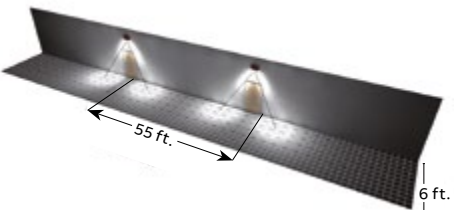

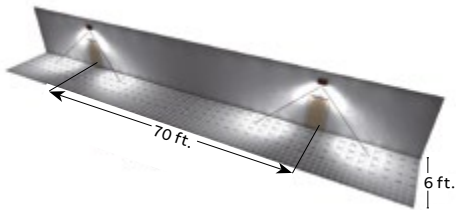

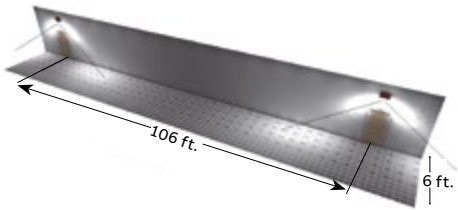

MR16 LED illumination

With the remarkable technology development in the last decade, the lightemitting diode (LED) is becoming the preferred solution in lighting applications. The emergency lighting industry is no exception: today virtually every new product introduced to market includes “white light” light LEDs for emergency illumination. Extremely efficient and long-lasting, LED lamps become the natural alternative to incandescent lamps due to three main advantages:

- **Lamp efficacy:** 50–100 lumens per watt compared to 15–30 lumens per watt of the best halogen lamp. Allowing for smaller batteries and units and/ or remote capacity
- **Operational life:** 30,000+ hours, equivalent to a lifetime warranty in emergency lighting.
- **Lower lamp temperature:** 80–120°C (176–248°F) is a huge benefit for lighting in hazardous locations.

MR16 LED lamp benefits

- Reduces total cost of ownership, uses few fixture due to superior illumination, thus reducing installations cost and future maintenance of the entire system.
- UL-recognized components.
- Available for standard battery voltages 6V, 12V and 24V as well as 120V operation.
- Energy-efficient LED MR16 lamp provides equivalent lighting performance to a much higher watt halogen MR16 lamp.
- Reduces required battery capacity by 75%, for battery units and remote heads.
- Small profile, compact white lighting is ideal for architectural applications.
- Typical 30,000 hours of operational life.
- Vibration-resistant LED stands up to industrial environments.
- Ideal for indoor and outdoor use.

Lamp	Description	Photometry
	200-220-Lumen 4W MR16 LED Leading the technology trend, Emergi-Lite® offers a complete series of 4W MR16 LED lamps available for all the standard battery voltages: 6V, 12V, 24V and 120V. With up to 30,000 hours of operational life and a luminous flux of typically 200 to 220 lumens, they are available with most emergency heads designed to hold an MR16 lamp and meet the majority of illumination specifications. For example: one pair of LED emergency heads installed at a height of 7.5ft illuminates a 6ft by 55ft path of egress.	 55-ft. path of egress 2 X 4W MR16 LED Based on an average of 1 foot candle
	340-Lumen 5W MR16 LED Keeping pace with technology, in 2012 we introduced a 12V-5W MR16 LED lamp. With a typical luminous flux of 340 lumens, this lamp has the same lighting performance as a 20W high-output halogen MR16. A twin emergency head installed at a height of 7.5ft illuminates 70ft path of egress	 70-ft. path of egress 2 X 5W MR16 LED Based on an average of 1 foot candle
	540-590 Lumen 6W MR16 LED A 6W MR16 LED lamp delivers up to 590 lumens for an average spacing in emergency lighting of 106 feet with an efficacy of 98.3 Lm/w, it is over 6 times the efficacy of a MR16 35W halogen with similar light output. This lamp can deliver the highest linear foot of illumination per watt on a path of egress! (spacing in feet / watt) 8.83ft compare to 1.37ft for a MR16 35W.	 106-ft. path of egress 2 X 6W MR16 LED Based on an average of 1 foot candle

Highly efficient LEDs provide many cost-saving benefits

The unseen solution – generator capable 12V up to 100W capacities

Housing

- Galvanized steel back-box
- Easy access to internal components
- Head assembly door and trim plate powder coated in a white finish
- Finish can be customized on site with paint or wallpaper
- Choice of various 12 volt MR16 LED lamp wattages
- Complete 360° head assembly door rotation
- Slip gear mechanism protects unit and objects against forcible stops

Mounting

- Recessed mount into ceiling or wall with cavities
- Special bar hangers included for installation in sheet rock or T-bar ceilings
- Can be installed on the wall stud or ceiling beam with simple, U-shape bracket
- Head assembly includes keyhole slot and quick-connect plugs for easy installation

Electronics

- Pulse plus charger
- Low voltage disconnect
- Automatic brownout protection
- Battery lock-out
- Fused output circuit
- Optional Advanced Diagnostics
- 120/277 60Hz

Choice of sealed maintenance-free battery

- 12V lead-calcium battery

Approvals

- CSA-US (to UL 924 standards)
- BC – California Energy Commission Title 20

Warranty

- Unit has a five-year limited warranty

Prestige™ Edge-Lit Series

Premium die-cast aluminum exit sign

Construction

- Housing, trim plate, trim ring and canopy made of die-cast aluminum
- U-shaped clear acrylic Legend panel features laser-etched letters and chevrons
- 6 inch EXIT lettering legend, available in red or green
- Choice of finishes: white, black or brushed aluminum, polished brass, polished chrome or bronze

Mounting

- Modular design allows for surface or recessed mount
- Canopy included for surface wall, end or ceiling mount applications
- Trim ring included for recessed wall or ceiling mount applications.
- Housing provided with conduit knock-out 1/2", top, back and end
- (C) circular or (A) angular trim plate used for surface or recessed wall or ceiling mount applications
- Hanger bars included for lay-in installation in T-bar grid

Special wording panels

- Available. Contact your sales representative with your design requirements

Electronics

- Optional Advanced Diagnostics
- Optional Nexus® monitoring system
- 120-277 60Hz

Approvals

- UL 924 listed
- Meets NFPA101 (Life Safety Code), NFPA 70 NEC, OSHA illumination standards
- E-California Energy Commission Title 20

Premier™ Exit Series

Specification-grade, LED, thermoplastic, snap together exit sign

Construction

- White or black UV stabilized thermoplastic enclosure
- 6 inch EXIT lettering legend, available in red or green
- Field-selectable chevrons

Mounting

- Surface mount
- Canopy included for end or ceiling mount applications
- Universal J-box mounting

Special wording panels

- Available. Contact your sales representative with your design requirements

Electronics

- Optional Advanced Diagnostics
- Optional Nexus® monitoring system
- 120/277 60Hz

Approvals

- UL 924 listed
- Damp location (50°F to 104°F)
- Meets NFPA101 (Life Safety Code), NFPA 70 NEC, OSHA illumination standards
- E-California Energy Commission Title 20

Warranty

- Unit has a five-year limited warranty
Detailed warranty terms located online at:

HP Series

NEMA-4X, high-performance industrial battery unit

Housing

- Compact gray fiberglass housing with captive screws
- NEMA-4X rated
- All external fasteners and hardware are constructed of stainless steel
- Die-cast aluminum LED heads

Mounting

- Simple and easy to install on walls, poles, columns, struts also on vertical
- Pole or column installation bracket sold separately (order catalog number: PMK1-E)
- 1/2" NPT conduit entry on top or side

Performance

- High temperature lead-calcium battery operates 32°F to 122°F (0°C to 50°C) optional cold-weather -40°F to 122°F (-40°C to 50°C)
- 6W, 10W and 15W high efficacy LED emergency heads outperform traditional 50W MR16-IR halogen
- Innovative head design: four-LED and dual- driver provide illumination even in case of unexpected component failure

Electronics

- Infra-red remote control included in all models: allows testing the equipment without the need to climb a ladder. Distance range up to 30 ft. Universal, one remote control may test all the units on the job
- Pulse plus charger
- Low voltage disconnect
- Automatic brownout protection
- Battery lock-out
- Fused output circuit
- Standard Advanced Diagnostics
- Optional Nexus® monitoring system
- 120/277 60Hz

Approvals

¹Standard - minimum load required: 20% of load capacity

Survive-All™ SV Series

NEMA-4X, NSF, vandal-resistant housing – 6V-18W & 12V up to 54W capacities

Housing

- Full gasketed NEMA-4X housing
- Vandal-resistant UV stabilized polycarbonate cover
- Comes with both Phillips head for NSF location and tamper-proof screws

Mounting

- Universal J-box mounting
- Strut or I-beam installation bracket sold separately (order catalog number: PMK-E)

Lamp type

- Choice of MR16 LED lamp wattages

Electronics

- Pulse plus charger
- Low voltage disconnect
- Automatic brownout protection
- Battery lock-out
- Fused output circuit
- Magnetic test switch
- Standard Advanced Diagnostics (non-audible)
- Standard 15 minutes time delay
- Optional Nexus® monitoring system
- 120/277 60Hz

Battery

- 6V or 12V lead-calcium battery

Approvals

- UL 924 listed
- UL listed for wet and damp location (50°F to 104°F)
- UL listed for cold weather option (-40°C to +40°C/-40°F to +104°F)
- NSF certified for use in food processing plants
- NEMA-4X rated
- BC – California Energy Commission Title 20

Warranty

- Unit has a five-year limited warranty
- Detailed warranty terms located online at:

Survive-All™ SVX Series

NEMA-4X, vandal resistant and harsh environment exit sign

Construction

- Full gasketed NEMA-4X housing
- Frame: polyvinyl chloride enclosure, fully gasketed around the lens, backplate and canopy to prevent water infiltration
- Faceplate: heavy-duty, vandal-resistant polycarbonate
- Backplate: heavy aluminum
- Comes with both Phillips head for NSF location and tamper-proof screws
- 6 inch EXIT lettering legend, available in red or green
- Field-selectable chevrons
- Choice of finishes: black, white, gray or brushed aluminum

Mounting

- Surface mount
- Ceiling and wall mount are NEMA-4X
- End and pendant mount are not NEMA-4X
- Canopy included for end or ceiling mount applications
- Universal J-box mounting
- 1/2 inch conduit entry on top and sides

Special wording panels

- Available. Contact your sales representative with your design requirements

	(LI)= 12V-5W, MR16 LED	-GY= Gray	SM= Mounting plate
	(LJ)= 12V-6W, MR16 LED		
	(LL)= 24V-4W, MR16 LED		

Example: EF40P(LG)

Series	Lamp type/ wattage	Lamp type	Options
EF40= Die-cast back plate single head NEMA-4X	(LA)= 6V-4W, MR16 LED	Blank= White	Blank= No options
EF40D= Die-cast back plate double head NEMA-4X	(LG)= 12V-4W, MR16 LED	-BK= Black	T= Tamper proof screws
	(LI)= 12V-5W, MR16 LED	-GY= Gray	
	(LJ)= 12V-6W, MR16 LED		
	(LL)= 24V-4W, MR16 LED		

Example: EF40D(LJ)

HPHRL Series Hazardous Locations

Class I Division 2, Class II Division 2, Class III high-performance remote fixture

Description

- Lightweight polycarbonate gray housing and fully adjustable
Die-cast aluminum heads designed for Class I Division 2 Groups A, B, C and D, Class II Division 2, Groups F & G and Class III applications facilities
- Can be installed in varied temperature conditions:
-40°F to 131°F (-40°C to 55°C)
- High-efficacy LED emergency heads outperform traditional 50W incandescent lamps
- Innovative head design: four-LED and dual-driver provide illumination even in case of unexpected component failure
- Simple and easy to install on building walls, columns, struts, etc. On vertical position for columns use mounting bracket (order separately catalog number: PMK1-E)

Approvals

- UL 924 listed
- Listed UL 844 Standard for Class I Division 2 Groups A, B, C & D, Class II Division 2, Groups F & G and Class III

Warranty

- Unit has a five-year limited warranty
Detailed warranty terms located on page 178 or online at:
www.emergi-lite.com/usa/files/EL_Warranty.pdf

Dimensions

Dimensions are approximate and subject to change.

Warning: The mounting column must be anchored at both ends: floor and ceiling.

Photometry performance

Whether installed indoors or outdoors, the HP Series of LED emergency lights deliver a stable and consistent illumination on the path of egress for a wide range of mounting heights. Depending on the application, one may select and specify among three levels of lumen output. See cross reference to traditional incandescent emergency lights below.

Spacing center-to-center (feet)

Spacing center-to-center (feet)	
Mounting height	Lamp L15/15W, 1300Lm
10 ft	140
15 ft	135
20 ft	130
25 ft	120

Industrial environment: wall mounted equipment, reflectances: 10/10/10; 6-ft wide illumination path. Illumination as per NFPA101; Average: 1fc; Min: 0.1fc; Max/ min< 40:1

LED head	Power	Total lumens	Out-perform spacing of incandescent lamps
L15	15W	1300	50W MR16-IR halogen

How to order

Series	# of heads	Lamp type/ wattage
HPHRL= High-performance hazardous location remote	Blank= Single head D= Double head	L15 = 12-24V – 15W (1300 lumens)

Example: HPHRLDL15

EL-2LED Series

Low energy, low maintenance emergency lighting for moderate budget applications

ESCORT II

Construction

- UV stabilized thermoplastic body
- Fully adjustable Cluster™ LED glare-free heads
- Choice of white or black housing

Mounting

- Ceiling or wall mount
- Universal J-box mounting

Lamp type

- White LED 3.6V-1.8W each, 70 lumens per head

Electronics

- Pulse plus charger
- Low voltage disconnect
- Automatic brownout protection
- Battery lock-out installation
- Fused output circuit
- Optional Advanced Diagnostics
- 120/277 60Hz

Sealed maintenance-free battery

- 3.6V nickel-cadmium battery

Approvals

- UL 924 listed
- Damp location 50°F to 104°F (10°C to 40°F)
- UL 94, 5VA flame rated (68°F to 86°F, 20°C to 30°C)
- BC – California Energy Commission Title 20

Warranty (subject to proper installation and maintenance)

- Unit has a three-year warranty
- Detailed warranty terms located online at:
www.emergi-lite.com/usa/files/EL_Warranty.pdf

Photometric performance

Spacing center-to-center (feet)	
7' mounting height	15' mounting height
15'	4'

Dimensions

Dimensions are approximate and subject to change.

Power consumption and unit rating

				Current (A) / Power (W)
Model	AC specs		AC power stand-by	120/277VAC, 60Hz

Blank= White B= Black	EL	-2LED= round LED array	Blank= No option (CEC title 20 approved for California)

Example: EL-2LED

EL-2RHL Series

High output lithium LED battery unit

Housing

- UV stabilized thermoplastic body
- Two adjustable high output LED lighting heads
- White finish

Mounting

- Wall or ceiling mount
- Universal J-box mounting

Lamp type

- Two 9.6V-5.4W LED heads, 550 lumens per head

Electronics

- Lithium-ion battery
- Pulse plus charger
- Low voltage disconnect
- Automatic brownout protection
- Battery lock-out
- Fused output circuit
- Standard Advanced Diagnostics
- 120/277 60Hz

Approvals

- UL 924 Listed
- Damp location (50°F to 104°F)
- UL 94, 5VA flame rated
- BC – California Energy Commission Title 20

Warranty

- Unit has a three-year warranty
- Detailed warranty terms located online at:
www.emergi-lite.com/usa/files/EL_Warranty.pdf

Model	AC specs		AC power stand-by
EL-2RHL-AD	120/277VAC	0.06 / 0.20A	0.5W

How to order

Series	Heads
EL	-2RHL-AD= Two round high output LED heads with Advanced Diagnostics

Example: EL-2RHL-AD

Mini Inverter Series

Interruptible unit equipment 125W, 250W, or 400W

Housing

- 14-gauge steel
- White semi-gloss powered-coat paint finish

Mounting

- Surface mount
- Optional recessed T-bar (125W unit only)

Lamp types operated

- LED
- Incandescent
- Fluorescent
- Operating switched, normally-on or normally-off fixture types
- Incandescent, LED, fluorescent lamps and ballast combinations, including triac dimmable ballasts (consult factory if DALI dimming)

Load capacity

- 125W, 250W or 400W
- Line voltage allows for remote mounting of the emergency fixtures at distances up to 1000 feet
- May accept load to it's full capacity when load feature power factor of 0.9 for 250W models and 0.8 for 125 and 400W models

Electronics

- High-efficiency pure sine wave inverter at 250W capacity or higher
- Temperature compensated charger
- Replaceable output fuse protection
- Low battery voltage disconnect
- Unit comes standard with electronic lockout and brownout circuits

Controls

- Standard with a **non-audible self diagnostic and self testing**/charger is fully self-contained, fully automatic microcontroller- based system
- Optional **audible auto diagnostic** available
- Optional **Non-Advanced Diagnostics** available
- **Non-Advanced Diagnostics** option for applications with emergency power controls
- Standard lighting control override for 0-10V dimming systems

Load shedding (available in 250W only)

- During a power outage the emergency fixture is dimmed to 25% or 45% brightness output. Reducing wattage draw from the fixture will allow for more fixture to be connected to the Mini Inverter.
- Maximum 20 Emergency fixtures can be daisy chained per EMIU 250

Nexus® Option

- Units equipped with Nexus® self-testing monitoring system circuitry shall selftest, in accordance with NFPA101, Life Safety Code minimum 30 seconds every 30 days, 30 minutes every six months and 90 minutes annually as well as keep a history of all testing logs, plus feature a real-time diagnoses, as well as, be able to locate exact fixture location while notifying service personnel to the status of the fixture via email notification. Nexus® system interface with an improved minimum load lost detection of 10%

Sealed maintenance-free battery

- 12V oversized valve regulated lead-calcium (VRLA) battery
- Provides 90 minutes of emergency operation

Power requirements

- Choice of voltage 120V in/120V out or 277V in/277V out operation, 60Hz

Approvals

- UL 924 Standard
- Meets or exceeds all National Electric Code and Life Safety Code Emergency Lighting Requirements
- BC – California Energy Commission Title 20

Warranty (subject to proper installation and maintenance)

- Battery has a 3-year full, plus 7-year pro-rata warranty
 - Unit has a three-year warranty (excluding lamps and fuses)
- Detailed warranty terms located online at:
www.emergi-lite.com/usa/files/EL_Warranty.pdf

Specifications
